CompE 361 Windows Programming Fall 2022
Assignment #4

Grader: Guga Esitashvili, gesitashvili5591@sdsu.edu

You are given the “**Assignment4.xlsx**” excel file for sample data, the “**Assignment4.py**” Python file, and **users.ui**, **show_user.ui** files. You need to work on the data in the excel file.

users.ui is used to list all users in the excel file.

show_user.ui is used to show the details of any user from the **users.ui**.

Assignment4.py contains the required codes to list and show users.

You are expected to write required codes to **update** and **delete** the user shown in **show_user.ui**.

- **(50 Points) Update** button needs to update the user. The update process effect both the excel file and the list in **users.ui**.
- **(50 Points) Delete** button needs to ask the user to delete the user shown in **show_user.ui**. If the answer is OK, then it needs to delete it from both the excel file and the list in **users.ui**.
